DiabloSport inTune i-1000 for 05-10 Ford Mustang GT, Shelby GT500 & GT-350

What is the DiabloSport inTune?

The DiabloSport inTune programmer is the all new successor for the Predator handheld tuner that you've come to know and love. The long tour of the Predator tuner was an excellent one, but it has finally reached its home stretch making way for the DiabloSport inTune. The DiabloSport inTune has all of the famous preloaded tunes and available adjustments as the Predator, in a smaller, more advanced, and easier-to-use device!

DiabloSport inTune delivers an enhanced user experience with easy-to-understand menus controlled through a color touch screen, automatic USB updates via the internet (with no cable kits to buy!), and broad range of vehicle support coupled with a host of vehicle specific features, all at an incredibly affordable price. It's like no other flash tuning device available, offering all of the functions users want, and fits in your pocket!

Supported Applications:

- 05-10 Mustang GT & GT-350: +20 HP/ & 25 ft./lbs. TQ
- 05-10 Mustang V6:
- 07-10 Mustang Shelby GT500: +40 HP/ 45 TQ, Pulley Tune 60 HP/ 60 TQ
- 08-09 Mustang Bullitt: +20 HP

Available Tunes:

- GT 91 & 93 Octane Performance Tunes: +20-25 HP/ 20-25 ft./lbs. TQ
- GT 87 Octane Performance Tune: +15-18 HP/ 15 ft./lbs. TQ
- GT-500 Premium Fuel Tune: 35-40 HP 35-45 ft./lbs. TQ
- GT-500 Premium Fuel Pulley Tune: 50-60 HP / 50-60 ft./lbs. TQ
- Cold Air Intake Tunes-no custom tunes required: JLT, Air Raid, K&N, Steeda, and Ford Racing
- Custom Tunes Supported for all applications

Performance Programmer

There is no setup required: simply plug the inTune into your vehicle's OBD-II port and select the tuning menu to automatically detect the ECU's calibration information. That will provide a list of available preloaded tunes to enhance both performance and economy. For example, a 2005 Mustang GT will typically see a 20 hp and 25 ft/lb torque gain with no other modifications running the 93-octane tune. In addition to the famous preloaded "Diablotunes", Diablosport's prewritten CAI and pulley upgrade tunes are like getting a free trip to the dyno for those mods!

Full Support for Custom Tuning

This device can be fully custom tuned by a DiabloSport Dealer using our CMR Tuning software. There is virtually no limit to the amount of custom tunes the inTune can hold! Tunes can be created for any mix of aftermarket parts on your Mustang including superchargers, turbos, larger Injectors and more. DiabloSport's CMR Tuning software suite allows dealers to effectively calibrate your Mustang for ANY aftermarket bolt on you have installed or have in mind for your vehicle!

Data Logging

The inTune offers users the ability to log and record information from the stock sensors in a numerical readout format, as well as additional input to log data read by an added aftermarket sensor, like a wideband O2 from such companies as AEM or PLX, an EGT sensor, and more.

Diagnostic Code Reader

The handheld device can also be used as a diagnostic code reader. You can save hundreds of dollars each year by reading/clearing your own computer codes rather than paying a dealer to do the same. This function can be used to pull all engine-related trouble codes.

Automatic Online Updates with Mac compatibility

Staying up to date with inTune couldn't be any easier: FREE updates come as downloads from the internet and load through our new Auto Updater with the included USB cable, requiring no software to install on your computer, and no additional purchases! This new technology means that sending a custom tune to the inTune is as simple as dragging and dropping it off the desktop of a Mac or PC. Updates can include improved tunes, new vehicle applications, better functionality and even new user interface enhancements.

The inTune will allow you to adjust the following parameters, no custom tunes necessary:

- Gear Ratio
- Tire Size
- Cooling Fan Control
- Fuel Rich/Lean Adjustment
- MAF Curve Adjustment
- Spark Timing Advance/Retard
- Idle RPM
- Rev Limiter

- Speed Limiter
- Torque Management Adjustment
- Disable Traction Control
- Exhaust Temp Controls
- Global Spark Adder
- Shift Timing
- Shift Pressure
