

## 85790 ROTOR BOR SPOT WELD CUTTER

### Applications

Drill out spot welds for OEMA camber/caster adjustments on 86 & up Ford Taurus, Mercury Sable and Lincoln Continental.

This tool should be used with an air or electric hand drill at speeds between 300 and 600 RPM. **Do not use this tool at speeds higher than 1000 RPM.** Use of a cutting fluid such as "Cool Tool" (PN 85774) will enhance the cutting life of this tool.
