

THERMAFLECT SLEEVE™

REFLECTIVE WIRE SLEEVING

APPLICATIONS:

RATED TO:

1100°

Keep your wiring, lines, and cables protected from heat. Thermaflect Sleeve™ acts as a thermal barrier capable of reflecting up to 95% of radiant heat away (requires minimum of 1" of airspace). It is excellent to use on your fuel lines and air intake and intercooler pipes. By keeping fuel and air intake temperatures cool it helps to prevent vapor lock, improves performance, improves mileage and also reduces fuel evaporation. It also works as a high temperature wire loom heat shield shielding wires from severe heat, prolonging their life. A 3' length our Thermaflect Sleeve™ weighs less than 6" of the old silicone covered stuff. Though it weighs much less, it offers superior radiant heat protection. Thermaflect Sleeve™ withstands 1100°F of continuous radiant heat and 500°F direct heat. Also available in a hook and loop seam.

INSULATION TYPE: RADIANT HEAT **USES:** HEAT SHIELD SLEEVE FOR FUEL LINES, BRAKE LINES, WIRE HARNESSSES, INTERCOOLER TUBING, AIR INTAKES

SOLD IN 3' AND 10' LENGTHS

HOOK & LOOP CLOSURE

CUTS CLEAN AND EASY

WITHSTANDS 1100°F CONTINUOUS
