HIGH QUALITY INSULATING WRAP

*CAN WITHSTAND
1200°F CONTINUOUS
AND 2000°F
INTERMITTENT*

*LOWERS UNDER

APPLICATIONS:

RATED TO:

1200°

Premium exhaust wrap maintains hotter exhaust gases, decreases the density, and that allows the exhaust gas to exit the system faster! Increased exhaust scavenging is produced helping to lower intake temperatures: that equals more horsepower. Premium exhaust wrap also reduces radiant heat damage and can lower under hood temperatures by as much as 60%. Our premium grade exhaust wrap features a tighter weave than industry standard wraps, thus retaining more heat and fraying less. Premium Exhaust Wrap can withstand 1200°F continuous and 2000°F intermittent. Premium exhaust wrap can be fastened with Thermal-Tie™, hose clamps, or wire.
