

BLACK EXHAUST WRAP™

BLACK INSULATING WRAP

APPLICATIONS:

RATED TO:

LOWERS UNDER HOOD TEMPS BY 50%

VERMICULITE COATING

HOLDS COLOR LONGER

Black exhaust wrap maintains hotter exhaust gases, decreases the density, and that allows the exhaust gas to exit the system faster! Increased exhaust scavenging is produced helping to lower intake temperatures: that equals more horsepower. Black exhaust wrap also reduces radiant heat damage and can lower under hood temperatures by as much as 50%. This exhaust wrap features a black vermiculite coating. While it doesn't start off as dark as some graphite coatings, it holds its color longer than similar graphite coated wraps. It can withstand 1200°F continuous and 2000°F intermittent. Our black exhaust wrap can be fastened with Thermal-Tie™, hose clamps, or wire.
