

# THERMAFLECT TAPE™

## HIGH-TEMPERATURE REFLECTIVE TAPE

### APPLICATIONS:

### RATED TO:

*INSULATE  
COMPONENTS  
WITHOUT  
DISASSEMBLY*

*DURABLE  
ALUMINIZED CLOTH  
OFFERS MAXIMUM  
HEAT PROTECTION*

*INSTALLS EASILY WITH  
SELF-ADHESIVE BACKING*

This heat shield tape reflects up to 90% of radiant heat away from wires, lines, cables, hoses, and more! It is an excellent way to insulate components without disassembly, or it may be used as a means to hold other thermal insulation in place. It is also excellent as a quick "on the go" solution to heat problems. Our heat shield tape is a must have for your race track tool box! Durable cloth construction makes it longer lasting and more rugged than similar products. This reflective heat shield tape withstands 1100°F continuous radiant heat (requires minimum of 1" of airspace) and 500°F of direct contact. The reflective heat shield tape cuts easily and installation is simple with our high temperature self adhesive backing that sticks to any CLEAN surface.

**INSULATION TYPE:** RADIANT HEAT **USES:** WIRE HARNESSSES, FLOOR BOARDS, FIREWALLS, AIR BOXES, FUEL LINES, AIR INTAKES

PART NO.	DESCRIPTION
340001	THERMAFLECT TAPE™; 1½" X 3'
340020	THERMAFLECT TAPE™; 1½" X 20'

PART NO.	DESCRIPTION
340250	THERMAFLECT TAPE™; 2" X 50'
340410	THERMAFLECT TAPE™; 4" X 10'

# HP RACER'S TAPE™

## HEAT PROTECTIVE EMULSIFYING TAPE

### APPLICATIONS:

### RATED TO:

*EXCELLENT WAY TO  
INSULATE WIRES QUICKLY*

*SELF-EMULSIFYING TAPE*

Racer's Tape is a self emulsifying tape that provides rugged heat protection up to 450°F. Using the guide lines to wrap, the tape will stick to itself forming a bond that can only be cut with a knife. The tape does not harden; it remains flexible but will not unravel. HP Racer's Tape is an excellent way to protect components without disassembly.

**INSULATION TYPE:** RADIANT HEAT **USES:** WIRE HARNESSSES, HOSES, FUEL LINES, BRAKE LINES

PART NO.	DESCRIPTION
330004	HP RACER'S TAPE™; 1"W X 12'; BLACK
