HKS Fine Tune V Belts are light weight and uses EPDM (Ethylene Propylene Diene Monomer) Rubber for better durability and performance in hotter and colder conditions with improved friction tolerance.

Applications may vary, please consult with the Manufacturer or OEM Service Manual for part numbers.

Features:

- Increased durability at high temperatures
- Increased performance in cold weather
- lightweight with good friction tolerance properties means that excess tension is not required whilst anti sound properties reduces belt squeal.

☆EPDM (Ethylene Propylene Diene Monomer) Rubber:

• Better durability and performance in hotter and colder conditions with improved friction tolerance.

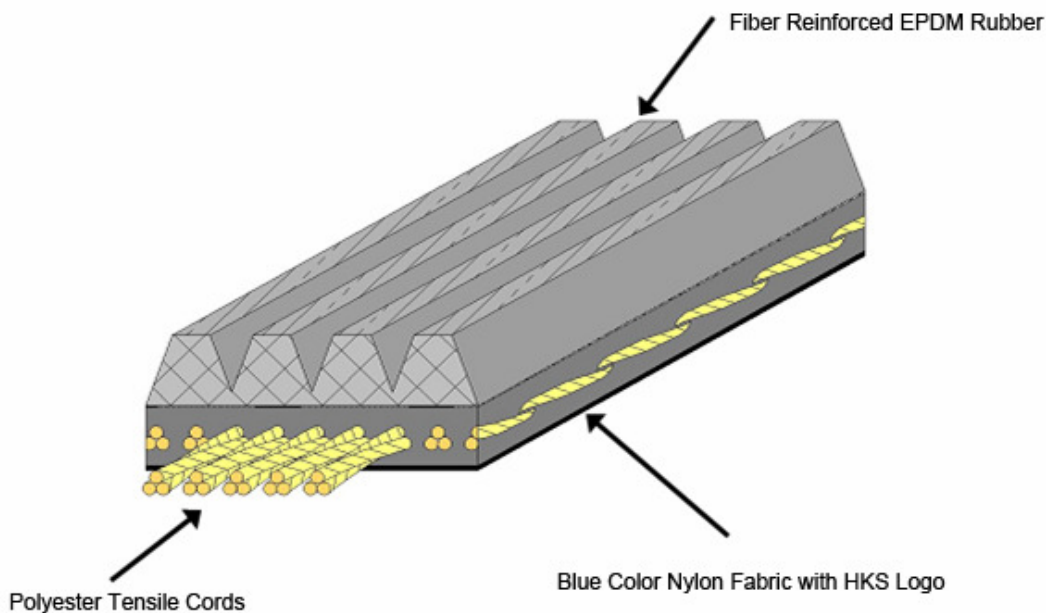

※V Belt color is blue with HKS logo.

Colored nylon fabric is used for better anti color fading properties.

• HKS logo, product name and belt length are printed on each belt.

Performance comparison with general stock belt

High temperature durability	Low temperature durability	Wear and abrasion resistance	Weight
4 times greater	10 times greater	30% improvement	17% lighter
