

1)

Brackets FL 163 and FL164 are shown in Fig.#1 , your application will use either one of these or the other depending what kind of boards you purchase, if you notice the 2 flanges are bent in opposite directions from each other on these 2 brackets compared to the other brackets in the kits.

2)

In the center location only, the brackets in Fig.1 are to be used as shown in Fig#2. They will line up with the factory hole in your truck.
