

Tools required:

- 7/16" socket or nut driver

**FOR STEP PAD**

1)

Install step pad posts into predrilled holes.

2)

Tighten using 7/16 nut to step pad post.  
Just snug nuts do not over tighten.

**FOR STEP TREAD**

3)

Wipe off surface where step tread will be placed.

4)

Position step tread where you want it. Then holding step tread in place remove adhesive cover one row at a time and press firmly to hold in place.
