**+Gains of up to
9hp/7 ft.lbs of torque**

Key features:

- Easy and complete Bolt-on System
- MR Technology Process
- Injen Power-Bands
- Dyno Tuned machined Mass Air Flow sensor adapter
- Provides Safe Air/Fuel Ratio
- Power gains of up to 9 hp/7 ft-lbs of torque
- Now available in Polish and Glossy Black Powder Coat

Out with the old and in with the new...Technology that is!

SP1578 is the all new Pre-Tuned Cold Air Intake system for the one and only 2006 Civic Si. MR Technology is a patent pending process engineered to work in conjunction with today's sophisticated Engine Control Units (ECU), as can be found in the 2006 Civic Si. With our expertise, expect gains of up to 9hp/7ft-lbs of torque, while relying on MR Technology for Safe Air/Fuel Ratios and peace of mind. Now available in Polish and Glossy Black Powder Coat.

MRtech1

This graph without the use of MR Technology, reveals a very unstable and lean air/fuel ratio while making high horsepower/torque gains.

MRtech2

When MR Technology is implemented horsepower/torque gains are maximized while air/fuel ratio becomes stabilized. MR Technology tunes the intake system to within SAFE FACTORY LIMITS, making it the THE WORLD'S FIRST TUNED INTAKE SYSTEM!
