TR Air Pump Delete Kit *For Subaru Impreza WRX & STi*

PRODUCT DESCRIPTION

TR Air Pump Delete Kit is used to eliminate the air pump tubes that connect to the cylinder heads on 2006-2008 Subaru Impreza EJ engine. The TR kit seals off the cylinder head where the air injection tubes connected. Used for high performance applications or adapting later cylinder heads to earlier EJ255/EJ257 engines. The plates are machined from T6 aluminum with a titanium anodized finish and all mounting hardware and gaskets are included.
