

## Fuel Rail Kit for Mitsubishi Evolution 4-9 4G63

### PRODUCT FEATURES

Higher power output demands higher flow of fuel to the engine. The TR bolt-on upgraded fuel rail for EVO 4-9 offers the perfect solution. The kit is thicker than stock fuel rail and designed for high volume, high flow fuel supplies and high performance applications. TR fuel rail supports up to 650 HP. The Kit can accommodate original injectors.

### SPECIFICATION

|                          |                            |       |
|--------------------------|----------------------------|-------|
| Material                 | Aluminium                  |       |
| Flow Capacity            | 56cc                       |       |
| Injector Compatibility   | Denso Top Feed I.D. Ø10.85 |       |
| Weight                   | 1.06 lbs                   |       |
| Fuel Rail Length         | 13.38"                     |       |
| Diameter                 | Fuel Rail Pipe             | 0.5"  |
|                          | Injector Outlet            | 0.53" |
| Injector Outlets Spacing | 3.15"                      |       |

### CONTENT OF KIT

- Fuel Rail
- Pipe Plug
- Rubber / Silicone Hose
- Fuel Injector O-Rings
- Anodized Fittings

### APPLICATION

| Vehicle    | Model              | Year      | Part Number |
|------------|--------------------|-----------|-------------|
| Mitsubishi | Evolution 4-9 4G63 | 1996-2007 | TR-FM1000   |
